An audio-visual show on the LHC (Large Hadron Collider, CERN, Geneva) was held at the Physics Department of Gauhati University last Saturday as a part of the weekend seminar programme of the department. It followed the September 10 event of firing of the first proton beams of the LHC. In this one-and-a-half-hour long multimedia show, several video movies related to the first beams of LHC, interviews by experts highlighting the safety of the machine, and depiction of efforts by scientists and engineers toward making of the LHC, were shown. The video clips were downloaded from the Internet by Dr Madhurjya P Bora, Reader of the Department and working president of the Physical Society.
