The Centre has approved proposals to set up IIIT in Assam along with Tripura. These new Indian Institutes of Information Technology would be set up under the not-for-profit public-private partnership (N-PPP) mode.

According to official sources, 11 State Governments have identified land and are in the process of identifying the industry partners. It is expected that another three States may also be sanctioned an IIIT each shortly under the scheme.

Mmajor objective in establishing IIITs is to set up a model of education which can produce best-in-class human resources in IT and harnessing the multi-dimensional facets of IT in various domains. These institutions are conceived as self-sustaining, research-led institutions contributing significantly to the global competitiveness of key sectors of the Indian economy and industry with application of IT in selected domain areas.
