Flood situation in Kaziranga National Park, the only World heritage Site in Assam, is again taking a disastrous form. With the rise of water level in the river Brahmaputra, new areas have come under the threat of flood. Nearly 70% area under Burapahar range of KNP is being water logged. On the other hand areas like Kohora and Agaratali is also being flooded. If the water level continues to rise at such a rapid speed the situation is most likely to deteriorate very soon. The situation may become more aggravated if the rainfall increases in the days to come.

In another incident a rhino died due to natural cause in Kohora range of KNP. In this year nearly 65 rhinos have died due to natural causes.
