A population estimation of the eastern swamp deer was carried out at Kaziranga National Park on December 6. A total of 681 swamp deers were counted, out of that 189 are male, 382 female and 107 yearlings. The eastern swamp deer, known Dal Horina in Asomiya, is a schedule I animal species under the Wildlife Protection Act, 1972. It may be mentioned here that the Kaziranga swamp deer is the last surviving population of the eastern swamp deer group. Other world population are the central group found in the Kanha National Park in Madhya Pradesh and the northern group found in Uttar Pradesh and along the Indo-Nepal border.
