A dead body of an adult rhino was found in Kaziranga on Sunday night. According to the Park authority, it was found near Rajapukhuri forest camp under the Bagori Range of KNP. They also says that the death of the rhino was natural and the horn was recovered. On the other hand nature-lovers says that after the recent flood the herbivorous animals are not getting sufficient amount of food and proper treatment which may be a causes of frequent death of the animals at 'World Heritage Site' Kaziranga. It has been recorded that seven rhinos died within 18 days.
